

## Get Complete Control of Your Logistics

JIDO is an advanced, yet easy-to-use GPS tracking and security solution for the transportation and logistics industry. With JIDO, you gain 24/7 access, visibility, and control over the status of your containers, trailers, freight wagons, or other shipments in transit and storage.

In addition to supplying continuous GPS location data, the rugged, weatherproof, and tamperproof device features built-in sensors and robust, real-time alerting; three months of location data storage capacity; and 4G dual-SIM support that ensures permanent connectivity – anytime, anywhere – using multiple network providers. A map-based visualization system illustrates tracking data and the JIDO system software also supports creation of geo-fences, routes, trips, stops, and zones.

Available in two models, JIDO E-Lock enhances the manual locking features of JIDO, allowing authorized personnel to lock and unlock the device remotely via SMS, mobile app, or Bluetooth. The device attaches and detaches easily from any vehicle or container in just minutes.

JIDO is an ideal solution for the multimodal and industrial transportation industry that requires full protection of valuable, in-storage assets in terminals and real-time, end-to-end visualization of containers in transit on ships, long-haul trucks, freight trains, and commercial transport.

## Benefits and Features

### Reliable, Real-Time Freight Tracking

Obtain precise GPS location data, with an accuracy of 2.5 m CEP, for moving assets on sea, road, and rail as well as stationary containers in terminals. Easily visualize via a map-based system in a web browser and mobile app.

### Full Security with Built-in Sensors

Built-in sensors provide immediate alerts for tampering, system failures, unauthorized use, and other critical issues that can jeopardize valuable assets. In addition, JIDO integrates with additional sensors, such as temperature and humidity, depending on business needs.

### Seamless Connectivity

Dual SIM card support ensures permanent connectivity using multiple network providers.

### Multiple Locking Options

While JIDO features a manual lock, JIDO E-Lock enables authorized personnel to lock and unlock the device remotely via SMS, mobile app, or Bluetooth.

### Dual Charging

An internal battery provides power for up to 30 days, but the device can also be connected to a vehicle's battery or an optional solar charging system.
